Facial Reader

RBH / BFR-FACE15Q

- Access effortlessly
- Control with ease
- Protect without limits

Facial, QR, and Mobile Access in One Device

Power, speed, and versatility come together in our new RBH BFR-Face15Q facial reader, designed to take contactless authentication to the next level.

Unlike traditional readers, BFR-FACE15Q supports mobile, QR, and facial access in one compact unit.

No more delays – recognize users even as they walk.

QR-Enabled Versatility
That Adapts to Your Needs

Access with your phone,
face, or physical credentials.

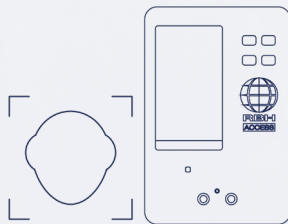

Reach a new level in Access Control Systems

Make the access experience intuitive and secure.
With the RBH Access BFR-FACE15Q reader, gaining entry is as simple as a smile.

Intuitive Management

Easy setup and fully compatible with AxiomXa systems to help you reach peak efficiency.

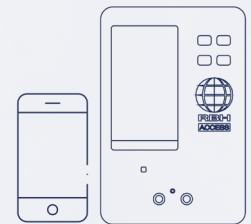

Advanced facial validation

Dual and infrared camera that captures a wide range of skin tones with exceptional speed and accuracy.

High performance

Instant verification and high storage capacity without compromising reliability.

Multi-format Authentication

Compatible with MIFARE®, DESFire® cards, QR codes, and blueLINE mobile credentials. An ALL-IN-ONE reader.

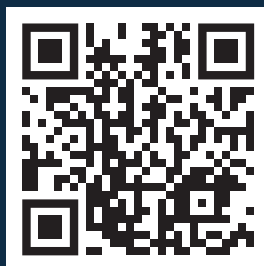

Built to Integrate, Ready to Scale

Trusted by global enterprises across healthcare, education, and high-security facilities.

Ready to modernize your building's security?
