Software

AxiomXa Beta Release (May 17, 2018)

AxiomXa Release (July 17, 2019)

AxiomXa SP0_From Beta (Sept 10, 2019)

- To upgrade from AxiomXa Beta to AxiomXa Release.

AxiomXa SP1 (Oct 8, 2020)

- Null reference error in DVR configuration fixed.
- Latest Activation wizard file added.
- SAL expiry date partial and full download added.
- Cardholder's advanced search, giving an error, issue resolved.
- Alarms not showing till restart client, issue resolved.
- SAL/MAL expiry date not saving when SAL/MAL and expiry date added same time, issue fixed.
- Card dump window is now selectable and copy able.
- Aimetis CCTV integration added.

RBH Access Technologies Inc.
2 Automatic Rd Suite 108, Brampton, ON L6S 6K8 905-790-1515

- Alarm monitor pop-up at log off/log in back even when Alarm queue not selected, issue resolved.
- Truvision CCTV integration added.
- Presets SET and GO functionality added for CCTV integration in general.
- Playback tool bar added for Playback commands for CCTV integration.
- Right click menu flickering on input/output group status, issue fixed.
- Live option was not showing on right click menu of AP/IP/OP status, issue fixed.
- Right click on *Invalid card number* message not showing right cardholder configuration window, issue fixed.
- AxiomXa application crashing when trying to move status window away from Event viewer, issue fixed.
- The first network's controllers not showing all the options in right click menu, issue fixed.
- History report now sorts on the basis of Date Time.
- Added additional date checks for packets sent by comm server, if packet date is less than 2015:01:01, it will change it to current date time.
- AP/IP/OP don't send status commands anymore when status is unknown.
- Offline download start and stop messages showing the right card number count now.
- "AxiomXa Dashboard" text added on main Tile in Tile view.
- User preference saving and loading implemented for Tile view.
- Rearranged all Tiles alphabetically in Tile view.
- New field "CommServer Bypass" is added in system settings, when selected will ignore any event blocking setup in monitoring of devices.
- Cardholder window is now usable even when not in edit mode to be able to view the properties of multiple cards.

RBH Access Technologies Inc.
2 Automatic Rd Suite 108, Brampton, ON L6S 6K8 905-790-1515

Updated Controllers' status to load status from database, and send status command only when the user manually requests the status.

- Restructuring /update of scripts for better performance.
- Status is set to unknown for all related devices when D-NET, C-NET or Network Offline messages are received.
- Status service is added.
- Now loading Device controllers and controller's status from database.
- All map status objects now updating to unknown status on D-NET, C-NET or Network Offline errors.
- Search button added on loading status for devices.
- New container method call was implemented for licensing.
- Search popup binded with data on all Devices.
- Reverted device search popup on status load to default load all devices.
- Network offline/online messages now displaying on Event viewer.
- Partial typing search improved in general.
- Application crashing when selecting Apartment in status window, issue fixed.
- Full download showing "failed to connect network" for every panel, issue resolved.
- Alarm Keypad Apartments (SS14) status' right click menu is disabled.
- Active directory changed from one level to subtree.
- Alarm and Alarm details appearing on top of Status detail window, and highlighted with Red; new option added.
- History and Database reports height control is set to Auto Height.
- Map Display/Map Pop-up window improved:
    - Double click Map's devices Icon to open Status detail window of selected device on side of the map.

- Card Import and Export:
  - Added additional fields for mapping during import.
  - Enhancements to Import and Export operations.
- History Reports:
  - Enhancements to report scheduling.
- Communications Service:
  - Enhanced logging operations.
- Integrations:
  - Added support for Suprema BioStar2.

RBH Access Technologies Inc.
2 Automatic Rd Suite 108, Brampton, ON L6S 6K8 905-790-1515

AxiomXa Version 6.1.8732 (Dec 15, 2023)

- Client:
  - Improved data validation for Cardholder configurations.
  - Cardholder SALs – improved UI.
  - Operator Profiles – modified permissions for access to Custom Fields.
  - Improved performance of Asset Management for large photos.
  - Improved Print quality for Badges.
  - Corrected an issue with the Bio Devices window.
  - Improved Search performance of Cardholders.
  - Corrected an issue with barcode creation.
  - Improvements to Visitor Management.
- Web Client:
  - Corrected an issue that could prevent a Cardholder from being edited.

AxiomXa Version 6.1.8836 (Mar 11, 2024)

- Added CodeMeter Version 8.0 to update package.
- Log4Net version updated to 2.0.15.
- Client:
  - Added Global Access Point Groups to the database module.
  - Corrected an issue where some operators would not sync with Active Directory.
  - Corrected an issue when saving an image that is too large.
  - Removed duplicate “History” selection in context menu in the Alarm Monitoring.
  - Guard Tour Alarm Messages *IP/AP skipped* will now show in Alarm monitor after the Client restarts.
  - Badge Printing – corrected an issue with creating Code 39 barcodes.
- Web Client:
  - Updated the description field for the Controller History Report ❖ Card Import:
  - Corrected an issue where not all OUs would load from Active Directory during Card Import.
  - Updated the message returned when an invalid path is provided during the Run now for MS Access files.
- Reports:
  - Corrected an issue where multiple records would show for the same AP for a cardholder in the Reader Cardholder Report & Cardholder Reader Report.
  - Refined the information included in the Main History Report & Operator History Report.
  - Corrected an issue where some device messages from UC-100 Keypads were not displaying in related reports.
  - Visitor Reports now includes additional details.
- Guard Tour:
  - Removed unused icons from window.
  - Updated the message displayed when invalid data is entered on Routes.

RBH Access Technologies Inc.
2 Automatic Rd Suite 108, Brampton, ON L6S 6K8 905-790-1515

- ❖ Database Restore:
  - ➢ Corrected an issue that could prevent restoring a database from a previous version of SQL.

AxiomXa Version 6.1.8927 (Jun 21, 2024)

- ❖ Upgrade Utility
  - ➢ Corrected an issue that could attempt to change the name of the server where the Guard Tour & BFR Services are running to localhost
- ❖ Client
  - ➢ Resolved an issue that could cause the Access Point Groups status window to not update when Access Points and Access Point Groups status windows are both open
  - ➢ Corrected some minor spelling errors (English/Spanish)
  - ➢ Corrected an issue that could cause a reader name to not be displayed in a Cardholder's Code Links
  - ➢ Partial Download will now send changes for Non-Reader Access Points (NRAP) on IOC16s
  - ➢ Resolved a potential issue where an error may be displayed when requesting the status details of controllers
  - ➢ When a visitor is late for checkout the card number will now display with the name in the Event Viewer window
- ❖ Badging
  - ➢ Code 39 Extended no longer prints the check digit
  - ➢ An error will now display when attempting to save a badge template when a barcode has been added, but a source field has not been selected
  - ➢ Code 39 barcode will now generate barcode for custom date fields in format "yyyymmdd" ❖ Card Import/Export
  - ➢ Cards with an invalid card status will no longer be given the "active" status, instead they will not be imported and will be listed in exceptions
  - ➢ Corrected an issue that could cause credentials with an Access Levels with no APs assigned to not be imported
  - ➢ Export now includes: xx fields
- ❖ Reports
  - ➢ Some reports were not generating an error message when it was not configured and an Operator attempted to preview the report
  - ➢ Improved operation of the History report generator
  - ➢ "Late for Checkout" event will now be included in the Visitor Activity History Report
  - ➢ Device Controller Report will now have descriptions selected by default as in other reports when run from the web client
  - ➢ Company and Department columns have been removed from the Reader Cardholder Report to optimize the report layout and performance
- ❖ Integrations

RBH Access Technologies Inc.
2 Automatic Rd Suite 108, Brampton, ON L6S 6K8 905-790-1515

- Added support for Videonetics CCTV integration
- BFR integration has limit set to 8 devices on shared RS-485 communication bus

AxiomXa Version 6.1.8977 (Aug 13, 2024)

- Integrations
  - Added support for Eocortex CCTV integration

AxiomXa Version 6.1.8992 (Aug 14, 2024)

- Client
  - OPC Integration will now be displayed in the license window
  - Maps module will no longer stretch images to fit window size, original aspect ratio will be maintained
  - Improved Partial Download for Non-Reader Access Point (NRAP)
  - New format added – HID Corporate 1000 48-bit FC+Card
  - Corrected an issue that could allow Operators to view/edit some Access Levels that the Operator Profile does not have permission to view/edit
- BFR Integration
  - Downloading credentials with MAL only will now download to BFR devices
- Database
  - Improvement to database procedures ❖ Card Import/Export

RBH Access Technologies Inc.
2 Automatic Rd Suite 108, Brampton, ON L6S 6K8 905-790-1515

- No longer displays mapping options for MAL/SAL fields when the license for this feature is not active

AxiomXa Version 6.1.9019 (Sep 13, 2024)

- Client
  - Added a search popup to the Access Point Group Status window when it is opened allowing the operator to select which APGs are to be displayed
  - Corrected an issue that could prevent some operators from being able to change the status of alarms
  - Changes to Access Point Management
    - Access Point type “Patient Elevator” has been changed to SCOSTA
  - New Event Types added for handling SCOSTA firmware
  - New Import Tool for SCOSTA application
  - Card Monitor window will no longer minimize when actively monitoring for events
  - Corrected some spelling/grammatical errors
  - Modified the width of the Schedule column in Access Levels to better display names
  - Corrected an issue that could cut off part of the Map editor when creating new maps
  - Corrected an issue that could cause changes to inputs and outputs to not save correctly
- Reports
  - New report for SCOSTA application
- Database
  - Improved external event logging
  - Modification to download procedures to handle SCOSTA firmware
- Integration
  - New integration feature set for SCOSTA requires custom controller firmware. Do not select these features without having the appropriate firmware

AxiomXa Version 6.1.9062 (Oct 25, 2024)

- Client
  - Changing the Input configuration will no longer clear the Input name under specific circumstances
  - Input/Output Groups will now properly refresh the status when a command has been sent
  - When a network is offline, the device statuses will now indicate unknown, instead of maintaining last known state
  - Corrected an issue that could cause a credential to be set to pending when adding from a remote client
  - Corrected an issue that could cause the Find Cardholder window to load an empty window instead of showing the search filters
  - Visitor window will popup the message "No search criteria was found so defaulting to Last 25!" when no search criteria were provided

RBH Access Technologies Inc.
2 Automatic Rd Suite 108, Brampton, ON L6S 6K8 905-790-1515

- Added a count for the number of apartments in the System Status
- In Tile View, added the “copy” function to the Hardware Setup
- In Tile View, improved the tile management so the module names fit better
- Autogenerate Card Number option has been removed from the System Settings

- Reports
  - Updated report for SCOSTA application
- Mapping
  - Corrected an issue that could cause the system memory to be held after a map has been closed ❖ Web Client
  - Corrected an issue allowing some operators to view access levels that should be hidden

AxiomXa Version 6.1.9062 (Nov 08, 2024)

- New Installation Packages for Professional and Enterprise
- Updated EULA displayed during installations to match Service Packs
- Updated CodeMeter installation to version 8.0

AxiomXa Version 6.1.9097 (Dec 03, 2024)

- Client
  - Removed the ability to edit the name of the default Master Company
  - Removed the ability to unassign cardholders from the Master Company
  - Corrected an issue that could prevent an Operator from seeing the Arm/Disarm actions on Inputs
  - When adding or editing a Cardholder and closing the active window, the system will now prompt the Operator to save changes before canceling the changes
  - Added an Area Filter to the Area Monitor
  - Updated the behaviour of the Card Monitor to better represent real-time events
- Web/Mobile Client
  - Cardholders added through the Web/Mobile Client will now be assigned to all Companies that the Operator is a member of
- Integration
  - RBH BFR-FACE SDK updated to 2.2.0.43 to support new BFR-FACE15Q series readers
  - Contact RBH if legacy BFR-FACE15 models are in use

AxiomXa Version 6.1.9139 (Jan 09, 2025)

- Client
  - Added an option to System Settings to make duplicate cards inactive ➢ Improved login processing time
  - Improved handling of Apartment Status including zones and outputs
  - Corrected an issue that could cause the Area Monitor to reload all Areas after a filter had been set

RBH Access Technologies Inc.
2 Automatic Rd Suite 108, Brampton, ON L6S 6K8 905-790-1515

- Corrected an issue that could cause the Card Monitor to list no area for a card after changing the area assigned
- Corrected an issue that could cause the Acquire Signature window to not open when editing a Visitor
- Corrected an issue that could cause the system to report a Device Controller to be online before communication with the Device has been established
- Resolved an issue where deleting an AxiomLink assigned to a Code Reader Link may leave invalid data in the CRL window

  Corrected an issue that could cause Multi Access Levels to use the same schedule for Access Points when adding Access Points with different schedules to the MAL
- Removed secondary Signature option from the Visitor Badge management module

❖ Reports
- Improved information handling for Main Report

❖ Card Import
- Added a feature option to update credential properties when a credential number is not specified. This feature enables all credentials of a given cardholder to be updated with the same data when selected.

AxiomXa Version 6.1.9187 (Mar 07, 2025)

❖ Client
- Added a filter feature to the device list in Global Commands
- Improved quick search function to the Cardholder Employee ID field
- Optimized some menus to make better use of screen space
- Increased the size of the Alarm Response buttons in both Standard and Tile views
- Updated the Cardholder window to remain on the same card after saving changes when the Cardholder has multiple cards
