RBH-N86-USB

The sleek and elegant N86-USB universal data wedge is a welcome addition when working with today's large credential numbers so that hard credentials as well as RBH mobile credentials can be easily and efficiently enrolled into your system. Originally developed to allow unmarked MiFARE cards to be easily enrolled into an open cardholder data field across all RBH software this reader can also capture card numbers into excel sheets for mass import or Credentials can be seamlessly transferred into a data field of any kind.
