Number: 46 Integra32[™] DVR Setup for Send messages

Introduction

Integra32[™] can signal a DVR to play back recorded video based on an Integra32[™] history event.

3/26/2004 2:36:49 PM	Audit message:Operator log(- 12
	·····			Administrator

Double click on the 'Camera' icon on the right side of the table. This will send the Date/Time of the event and the camera number to the DVR. The DVR should then playback the noted camera from the Date/Time provided.

Configuration

To configure the Integra32[™] for DVR history playbacks, setup the following three areas.

1. Set the DVR message option in the 'System Options' window.

Options	×
General Badge Font Email	
System options	
Number of days to keep Event <u>H</u> istory:	
365 - DV	/R Message Format
Void cards after	ML
0 Days	
	VR
	MC-LABEL
photo	AC-LABEL
User options	
🔣 🗖 Keyboard timout (min.)	
0 <u>-</u> min.	
Alarm sounds	
Print Area Report on Input Alarm on All Printers	
Activate Card When Visitor Checks in	
Area status check Interval 60 Seconds (m	in recommended 60)
	Ok Cancel

IMC-LABEL will send the event label with the data sent to the DVR. This label is provided so that the DVR can display it on the video monitor during playback. For example if you selected a 'Forced entry alarm' message for playback then the message 'Access Point: Forced entry alarm' should be displayed on the video monitor during the playback.

IMC-HISTORY should simply play back the video without any label being displayed.

2. Configure the devices (access points, inputs, & outputs) that are associated with cameras being recorded by the DVR.

Reader 79-1-1	×
General Modes Time-outs Links Alarms CCTV Advanced	
Send Messages to DVR	
DVR IP Address Port Number	
Ok Cancel	

Enter the camera number that is associated with this device, the IP address of the DVR, and the Port number (as specified by the DVR manufacturer).

Input 1.1	×
General Details CCTV Links Alarms	
Send Messages to DVR	
Camera Number	
DVR IP Address Port Number	
Ok Cancel	

Output 1.1	×
General Details CCTV Links	
✓ Send Messages to DVR	
Camera Number	
DVR IP Address Port Number	
Ok C	ancel

3. Select the messages sent to DVR and the key required to set for sending these messages from System messages window

System Messages					×
