RBH Access Technologies

30 Years of Secure Access,
Engineered to Last.

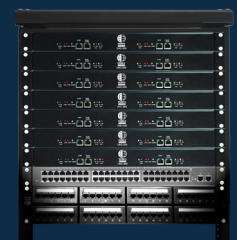

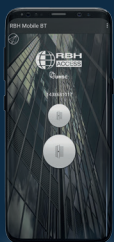

Your Security, Simplified with RBH Access.

For over 30 years, RBH Access has been at the forefront of access control innovation. From securing global enterprises to protecting local businesses, our advanced solutions are designed for seamless integration, unmatched reliability, and scalability to grow with your needs.

Why Choose RBH Access?

- Trusted Worldwide – Proven access control solutions for SMBs and enterprises.
- Flexible & Scalable – Works with most products and systems on the market.
- Award-Winning Innovation – Secure, efficient, and globally recognized.
- Comprehensive Security Ecosystem – Software, hardware, and cloud solutions.
- Customer-First Approach – Simple deployment, seamless user experience.

Advanced Security Solutions

AxiomXa, Integra32, AxiomCloud, and RBHView offer a comprehensive security ecosystem, combining access control, video management, integration, and scalable solutions for streamlined, secure operations in any environment.

AxiomXa

Modular security management with seamless expansion.

Integra32

Scalable access control with video and biometric integration.

AxiomCLOUD

Secure, cloud-based access management.
*Coming soon

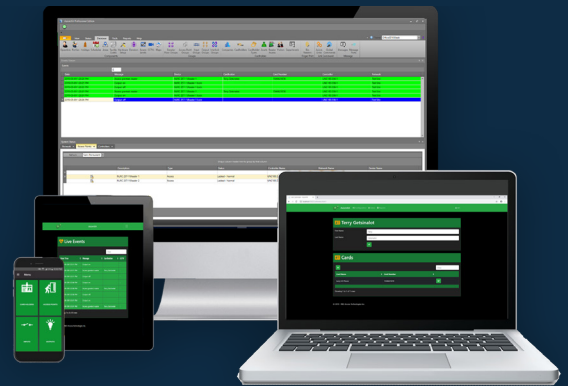

RBHView

Advanced video management for complete surveillance.

AxiomXa's modular design boosts efficiency, offering scalable and cost-effective security.

With robust architecture, customizable interface, and in-house design, it's the enduring, scalable, and affordable solution for systems of any size. AxiomXa seamlessly integrates Access Control, video monitoring, and Building Management Automation, powered by Microsoft SQL Server and MS .NET for unparalleled security.

Integra 32

The Complete Security Management Solution for SMBs

Integra32 offers integrated access control solutions tailored for small to medium-sized businesses, with scalability options for AxiomXa Enterprise system. Key features include multi-site support, mobile app accessibility, video and biometric integration, remote management, and visitor management.

These components work together to provide comprehensive security solution.

Hardware Controllers

Work in the harshest of environments and in a variety of applications all over the globe. We allow for a large selection of identification devices from proximity to fingerprint and iris, as well as a myriad of other technologies available on the market today.

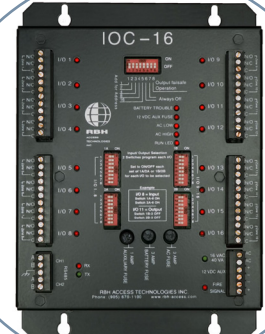

UNC100

2-door TCP/IP Universal Network Controller with optional PoE and 4 inputs + 4 outputs.

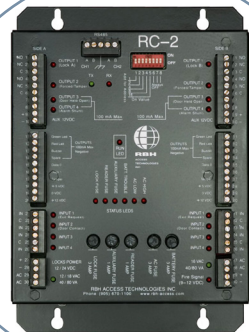

UNC-500

2-door TCP/IP Universal Network Controller with optional PoE and 8 inputs + 8 outputs.

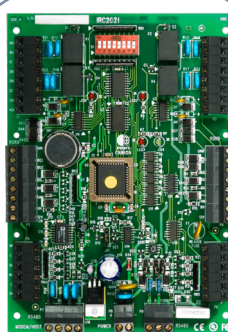

IOC16M

Intelligent
16-input/output controller.

RC2M

Reliable
2-door reader controller.

Intelligent Controllers

Universal, expansion and elevator controllers.

Features

- Small Footprint
- Enclosure and Rack options
- Visual Status Notifications
- Upgradeable Firmware
- Hardshell Environments
- POE and Aux Power

Multi-Technology Readers

RBH brings you award-winning mobile technology with the blueLINE series of Smart Card readers. In addition, we feature a full line of Proximity, Keypad, Vandal-resistant, and Biometric technologies.
