ACCESS

**Start Smart
Scale Fast
Stay Secure**

Browser-Based

Manage every site securely from any device—no local servers, and no maintenance required.

Fast to Deploy

Deploy your system quickly with enterprise-grade scalability built in.

Secure by Design

Backed by Microsoft Azure with full encryption, redundancy, and continuous monitoring.

Built to Grow

Expand from a single site to thousands through a unified, secure cloud platform.

Secure, Scalable and Seamlessly Managed in the Cloud

AxiomCLOUD complements RBH's suite of access control solutions, providing a flexible, cloud-based option for organizations seeking scalability, remote management, and continuous availability—without compromising reliability or support.

Designed and hosted in Canada, backed by Microsoft Azure, and supported by over 30 years of RBH expertise, AxiomCLOUD delivers secure, scalable, and always-available access control. Manage users, doors, and sites from any browser—no local servers, no downtime, and complete control backed by enterprise-grade infrastructure.

Advanced Tools for Enterprise Security

AxiomCLOUD centralizes management across multiple facilities, providing total visibility, control, and reliability from one secure platform.

- **Configure schedules and access levels across all sites.**
- **Add or deactivate users instantly.**
- **Assign credentials with precision.**
- **Generate real-time activity reports.**
- **Lock, unlock, or monitor doors remotely.**
- **Manage multiple facilities from a unified dashboard.**

Designed to Grow with You

A flexible architecture removes software support contracts and hidden upgrade costs, providing a predictable per-door operational model.

 **Always Available**
Secure and accessible 24/7, anywhere.

 **Future-Ready**
Scale easily—no reprogramming required.

 **Transparent Cost**
No hidden fees. No surprise upgrades.

Unified Hardware, Seamless Integration

AxiomCLOUD pairs perfectly with RBH controllers and readers—creating a unified solution built for any scale.
