# Integra 32™ SOFTWARE MODULES

Web Client

Use any Web browser to control the Integra32 Access Control System

Integra32's Web component harnesses the power of Window's built in Web Server (ISS) and .ASP technology to allow users Web browser access to their Access Control system.

Register your Integra32, Configure ISS, Install the Web module and now authorized users in your organization can use Internet, office LAN or your 3/4G connection to control your system.

On the road or in the office users can edit, control and report regardless of the operating system, device type or browser brand they use.

Multiple users can administer Integra32 via browser at the same time, while Integra32 operators permission settings still apply.
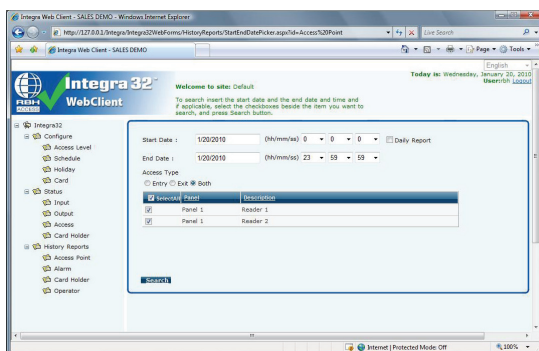

Edit settings:

Cardholders and Access Levels
Schedules and Holidays

Control and monitor:

Doors and Cardholders
Inputs and Outputs

Report on:

Door and Cardholder Activity
System Alarms and Operator's Log

Apple, Microsoft, Linux., iOS... Laptop, Tablet or Smart phone... Internet Explorer, Opera, Firefox, Chrome, Safari and more...

Multi-lingual user interface, multi platform accessibility and many more features make the Web Client module a valuable addition to the Integra32's long list of outstanding features.
