# AxiomV™ SOFTWARE MODULES

## Photo ID Module

### Create High Quality Photo ID  Credentials

AxiomV's Photo ID and Badging module is an easy to use, powerful tool  to create high quality, personlaized Credentials.
The Photo ID module is fully integrated into AxiomV, eliminating the need to use a third party software for creating badges.
A Sophisticated badge design tool allows for the creation of professional looking template layouts. This module is available for both Professional and Enterprise versions of AxiomV.

*Features Include:*

**Dual Sided Badge Design and Printing**:

**Signature and Fingerprint Cature**:

**Magstripe Encoding**:

**Use USB or IP Cameras with Direct Access to Native Settings**

**Multiple Templates in Horizonal and Vertical Designs**

**Fully Customizable Template Fields**

Multi-lingual user interface, multi-client installation and many more features make the Photo ID and Badging module a valuable addition to AxiomV's long list of outstanding features.
