

### AxiomV™ Report Server - RS

#### What is Report Server?

The AxiomV™ Report Server is an add-on module to the AxiomV™ system that allows the user to design and schedule history reports.

#### The benefits of using Report Server...

AxiomV™ comes preloaded with templates that can be used for running basic reports. The report server takes it up another level by including a custom report builder and the ability to schedule and email these custom reports automatically.
