# ¿Qué es el servidor de informes?

El servidor de informes es un módulo adicional del sistema AxiomXa™ que permite al usuario preconfigurar y programar el historial de reportes o informes.

## Ventajas de utilizar el servidor de informes

AxiomXa™ viene presinstalado con plantillas que pueden utilizarse para ejecutar informes básicos. El servidor de informes sube al siguiente nivel al incluir un generador de informes personalizados, que puede además programar y enviar por correo electrónico de forma automática.

## OPCIONES DE INFORMES
