Use any Web browser to control your AxiomXa Access Control System

AxiomXa Web component harnesses the power of Windows' built in Web Server (ISS) and .ASP technology to allow users Web browser access to their Access Control system.

Register your AxiomXa, Configure ISS, Install the Web module, and now authorized users in your organization can use Internet, office LAN or your 3/4/5G connection to control your system.

On the road or in the office users can edit, control and report regardless of the operating system, device type or browser brand they use.

Multiple users can administer AxiomXa via a browser at the same time.
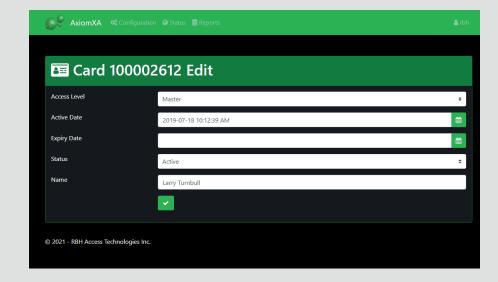

Edit settings:
- Cardholders and Access Levels
- Schedules and Holidays

Report On
- Door and Cardholder activity
- System alarms and Operator's log

Control and monitor
- Doors and Cardholders
- Inputs and Outputs
