MULTI AND SPECIAL ACCESS LEVELS

Today's access deployments demand flexibility and RBH Axiom is designed to exceed these challenges with the Multi- Access level feature. Ideal for large campus deployments this allows administrators to efficiently design access levels to a minimal and manageable number while creating an elegant deployment strategy for maximized security. Individual Expiry dates allow Multi-access levels to be disabled automatically as job functions change within a facility relieving the administrator from intense programming change burdens to increase productivity.

THIS ADVANCED FEATURE ALLOWS ANY CREDENTIAL TO HAVE:

- 1 Standard access level with individual expiry date.
- Up to 255 additional access levels with individual expiry dates.
- 32 additional special door access levels with individual start & expiry dates.
